

Optimal HVAC-control for everyone

Version: 2017

Summary

What started in 2001 with the founding of Vector Controls Group by Rolf and Tanya Schweizer quickly developed into a success story: the initial focus in ventilation controllers and thermostats quickly led to further controller applications. The modular design of sensors, controllers and operating terminals laid the foundation for the universal, communicating controller solutions from Vector Controls as they are known today.

Vector Controls employs 68 people in its offices in Switzerland, USA and China.

Mission

Our aim is to offer efficient, simple and inexpensive HVAC control systems that optimize indoor climate and conserve resources.

We are a reliable partner for the development and production of customer-specific solutions. We set new standards in service, reliability, customer and user benefits.

Scalable projects from a single source

We provide projects ranging from standalone ventilation controllers to HVAC system solutions for entire buildings with internal and external devices. The universal programmable controllers are the heart of all Vector applications. They are complemented by the wide range of sensors and the fieldbus connection of the controllers. With the graphical representation of the data with the GSM series (gateway server modules) every HVAC project can be optimally realized by using Vector Controls systems.

Product range:

- Universal PI controllers (wall and cabinet mounting) with preconfigured applications for pumps, comfort ventilation, air convectors, 2-pipe and 4-pipe systems, etc.
- Humidity, temperature sensors, temperature sensors, CO2 and air quality sensors
- Flexible and reliable OEM solutions
- Complete solutions for system integrators and distributors

Vector Controls Group

Our headquarters with research & development are located in Switzerland, another production site is located in China. Sales and distribution of the Vector Controls Group are located in Switzerland, China and the USA. Our products are sold worldwide.

Company	Activity
